Insurance Documents QA RAG Chatbot

Table of Contents

Project Overview

Chatbot Innovation

Advanced conversational assistant leveraging RAG pipelines to streamline insurance document qu
Dual functionality for smart tool selection, enabling effective handling of both document-specific an
Utilizes LlamaIndex for precise insurance data retrieval, LangChain for response generation, and C
Incorporates advanced caching mechanisms to minimize redundant computations and ensure real-

Key Features

Functionality & Technology

Handles document-specific and general queries efficiently using smart tool selection.
Employs LlamaIndex for fast and accurate insurance data retrieval.
Generates intelligent responses using LangChain and stores embeddings effectively with ChromaD
Implements dynamic chunking and caching mechanisms for optimal information retrieval and adapt

Tech Stack

Innovative Technology

Built using Python and key frameworks such as LlamaIndex, LangChain, and ChromaDB.
Integrates OpenAI's Embedding Model for generative responses, alongside LlamaIndex and LangC
ChromaDB ensures efficient data storage, enhancing scalability.
Incorporates cutting-edge technologies to deliver a seamless query resolution experience.

Challenges & Solutions

Overcoming Obstacles

Developed logic to determine whether to retrieve information from documents or perform internet se
Optimized multi-layer caching for embeddings and query-answer processes to enhance performan
Fine-tuned embeddings and outputs for seamless compatibility with ChromaDB and OpenAI APIs.
Addressed scalability and performance challenges to ensure a smooth user experience.

Future Scope

Expanding Possibilities

Plans to support additional file formats like Word and Excel for broader document compatibility.
Exploring integration of more generative AI models to improve response variety and quality.
Expanding capabilities to enrich user interactions and enhance chatbot functionality and adaptabilit
Leveraging advanced technologies to meet evolving user needs and deliver an enhanced user exp

Conclusion

Innovative Solution

The Insurance Documents QA RAG Chatbot provides a seamless query resolution experience usin
Its dual functionality and high-performance features simplify complex interactions and ensure accur
